$6\frac{2}{3} \cdot 3\frac{3}{11} =$  Original Problem

$\frac{20}{3} \cdot \frac{36}{11} =$  Step 1: Rewrite the mixed numbers as improper fractions.

$\frac{20}{\cancel{3}} \cdot \frac{3\cancel{6}^{12}}{11} =$  Step 2: 3 and 36 have a common factor of 3. Divide each by 3.

$\frac{20}{\cancel{3}} \cdot \frac{3\cancel{6}^{12}}{11} = \frac{240}{11}$  Step 3: Multiply the fractions.

$\frac{240}{11} = 21\frac{9}{11}$  Step 4: Rewrite the improper fraction as a mixed number.

$6\frac{2}{3} \cdot 3\frac{3}{11} = 21\frac{9}{11}$  This is the final answer.

## HERRAMIENTAS TIC UTILIZADAS EN LAS CLASES

Prices vary by course. Prices vary, depending on the class you want to take. UDEMYLAST but no less important, UDEMY also offers many algebra and algebra-related courses aimed at students and career professionals who need a small boost on the subject. Among the other topics, it offers courses on the algebra held by experts. Once the Algebra programs are completed, you can dive into other mathematical and professional topics that could help you move forward in the business world. The site is currently hundreds of algebra courses available in a variety of difficulty levels. Although it's worked in a field that regularly uses algebra, you may find that it has applications in everyday life, whether you make your finances work on projects improvement projects or planting a garden. There is also a challenge of the course eventually to help you test your skills and learn what you might want to continue to work on. LinkedIn LearningDid you know that there's More to LinkedIn Than Networking for Career Contact? It's available in many languages.
